

Quality and environmental policy

The management of K&K 95 Ltd. has recognized that the key to its business success is a satisfied and returning customer, and beyond that, the development of a stable, constantly expanding customer base.

The satisfaction of our customers and interested parties is achieved through our expanding range of products, the impeccable quality and reliability of our production.

Our activities bring us into contact with our environment, to which we are responsible. We believe it is important to have a positive impact on the environment through the effects of our activities and to prevent pollution from our activities.

To achieve this, we have integrated the business processes of the company into a single, integrated system that meets the requirements of the current international quality and environmental management standards ISO 9001 and ISO 14001, as well as the contractual requirements expected by our customers.

The main principles of the system we have built:

- ❖ We regularly monitor and evaluate the performance of our processes, and from time to time we set objectives based on the indicators we receive and monitor their achievement.
- ❖ We monitor and regularly assess the actual and potential impact of our activities on the environment. We take action to reduce or eliminate adverse impacts, prevent pollution and improve our environmental performance.
- ❖ Our management provides the necessary resources to maintain and continuously improve the quality of our activities and equipment.
- ❖ We ensure the quality and environmental awareness of our staff and provide them with continuous training.
- ❖ We take care in the selection of our partners and subcontractors. We consider it important that our customers' interests are represented in the performance of our suppliers.
- ❖ Our management ensures that the company complies with other applicable quality management requirements we have undertaken.
- ❖ Our management ensures that the company complies with applicable environmental laws and regulations and other applicable environmental commitments we have made.
- ❖ We consider the principle of sustainable development to be of paramount importance and therefore place great emphasis on both energy saving and on meeting an increasing share of our energy consumption from our own environmentally friendly sources.
- ❖ We are committed to the continuous improvement of our management system

LET OUR NAME BE A GUARANTEE OF QUALITY!
